Care of the Rheumatoid Arthritic Hand

Jeanine Beasley, EdD, OTR, CHT, FAOTA

Course Objectives:

- List three common hand deformities specific to rheumatoid arthritis
- Identify two specific orthoses for the rheumatoid arthritic hand that have been reported in the literature as effective treatment options
- Report the outcomes have improved as a result of instruction in joint protection principles
- Recognize which physical agent modalities currently have the most support in the literature for treatment of the rheumatoid arthritic hand
