Case Studies of the Hip: Osteoarthritis

Eric Robertson, PT, DPT, OCS, FAAOMPT

Course Objectives

- Identify the demographics and risk factors for hip OA
- Differentiate between intra/extra articular causes of hip pain
- Apply Altman's criteria and Sutlive clinical practice guidelines to identify diagnostic criteria for hip OA.
- Extrapolate findings from subjective and objective exam findings to identify proper interventions for hip OA, such as Hoeksma

Chapter 1: Demographics and Risk Factors for Hip OA

- Identify the demographics and risk factors for hip OA
- Differentiate between intra/extra articular causes of hip pain

Chapter 2: Differential Diagnosis 1

- Apply Altman's criteria and Sutlive clinical practice guidelines to identify diagnostic criteria for hip OA

Chapter 3: Planning the Physical Exam

- Integrate key historical findings with evidence-based assessment to develop a plan for examining this patient efficiently and thoroughly

Chapter 4: Interventions

- Extrapolate findings from subjective and objective exam findings to identify proper interventions for hip OA, such as Hoeksma
