Childhood Assessment of Normal and Dysfunctional Feeding & Swallowing

Maureen A. Lefton-Greif, PhD., CCC-SLP, BCS-S + Joan C. Arvedson, PhD., CCC-SLP, BCS-S

Course One Description:

This session will focus on defining feeding/swallowing disorders (FSDs) in infants and children, the prevalence/incidence and characteristics of FSDs, identifying underlying etiologies, and the impact of these problems on the development system.

Course objectives: Participants will be able to

- Define feeding/swallowing disorders (FSDs) in children
- Identify factors that may interrupt feeding/swallowing development
- Describe the prevalence of FSDs in children
- Identify challenges in understanding and managing FSDs in children
