

Course Objectives

MedBridge

Treatment of Children with Dysphagia

Maureen A. Lefton-Greif, PhD., CCC-SLP, BCS-S & Joan C. Arvedson, PhD., CCC-SLP, BCS-S

Course Description:

This course will focus on the management of infants and children with FSDs. The basic management principles, their hierarchy, and neuroplasticity will be discussed. Specific levels of the foci of interventions and specific therapies will be reviewed. Cases will be presented to illustrate management decision-making in the context of the evaluation and the model introduced during the first two courses in this series.

Course objectives:

- Identify factors that influence management plans by incorporating assessment information in the context of health, medical, and developmental issues
- Describe specific intervention techniques
