MedBridge

*Eyes on the Prize: Supporting Communicative Competence in Children*

Laura DeThorne, PhD, CCC-SLP

### **Course Objectives:**

- Determine communicative competence from a social model (in contrast to a medical model).
- Identify a child's specific activities that would benefit from communication support.
- Illustrate the importance of supporting flexible multimodal interactions.
- Cultivate a shared sense of responsibility for the success of children's communicative interactions.
- Reflect on how communicative interactions are shaped over time.
