

## **Learning Objectives**

MedBridge

*Universal Design in Community Environments*

Ingrid M. Kanics, MOT, OTR/L, FAOTA

### **Course Objectives:**

- Define disability as well as identify sources for gathering local disability statistics for their community.
- Discuss the history and evolution of Universal Design as compared to accessible design (ADA compliant design) in the context of community environments.
- Illustrate each goal of Universal Design and how applying that goal contributes to better inclusive design of a community space.
