

## **Learning Objectives**

MedBridge

*Developmental Foundations for Children with Feeding & Eating Problems*

*Jennifer Pitonyak, PhD, OTR/L, SCFES*

### **Course Objectives:**

- Identify the body structures required for feeding, eating, and swallowing
- Analyze the relationship between the underlying client factors (body structures & body functions) and required goal-directed actions (performance skills) for feeding and eating
- Recognize the expected developmental sequence of performance skills for feeding and eating that emerges from birth through early childhood
