

Learning Objectives

MedBridge
Speech Treatment for Vocal Tremor
Julie Barkmeier-Kraemer, PhD, CCC-SLP

Course Objectives

- Identify and describe the key characteristics obtained from the voice evaluation that are important for determining whether speech treatment is an option for an individual with vocal tremor
- Compare and contrast approaches used with individuals having co-occurring spasmodic dysphonia, more severe vocal tremor, and those meeting treatment discharge goals
- Understanding key principles regarding vocal tremor physiology that are addressed during case speech treatment demonstrations
- Assessing the typical methods used to achieve the vocal tremor speech treatment objectives
