Getting Started Addressing Swallowing & Feeding in the School Setting

Emily M. Homer, M.A., CCC-SLP

Course Objectives

- Identify the educational relevance for addressing swallowing and feeding in the schools and the IDEA regulations, which support it
- Recognize the ethical and legal considerations for addressing swallowing and feeding in the schools and the considerations that must be made in the school setting
- Utilize their district and design a team model for addressing swallowing and feeding as part of a system-wide procedure
- Recognize the importance of a team approach and be aware of the individual roles and responsibilities of school and medical team members
