A System-Wide Procedure for Addressing Swallowing & Feeding in Schools

Emily M. Homer, M.A., CCC-SLP

Course Objectives

- Determine a means for identifying students potentially at risk in their district for swallowing and feeding disorders and to determine if further intervention is warranted
- Use a protocol to establish a safe feeding plan for students in their district with swallowing and feeding disorders
- Establish a procedure to implement the swallowing and feeding plan by working with school cafeteria managers and parents. Identify the criteria for discharging a student from the swallowing and feeding team
