

## **Learning Objectives**

MedBridge

*Management & Treatment of Swallowing & Feeding Disorders in Schools*

Emily M. Homer, M.A., CCC-SLP

### **Course Objectives:**

- Identify the five steps in the process of providing consultative services to personnel involved in serving students with swallowing and feeding disorders.
- Determine the type of intervention required for students with a swallowing and feeding plan who have an oral motor impairment
- Identify the principles and guidelines to follow when working with students who are medically fragile or with progressive disorders
- Identify a school district's role in moving a student to PEG tube feeding
