## Learning Objectives

MedBridge

*Pediatric Aquatics for the Child on the Autism Spectrum or With a Sensory-Motor Processing Disorder*

Kiki Dickinson, MPT, PAQI

### Course Objectives:

Upon completion of this course, learners will be able to:

- List at least one way that the current evidence-based research can positively impact a clinician's treatment focus to improve their outcomes
- Discuss how at least one water principle makes aquatic therapy a beneficial medium to successfully treat the child with a sensory-processing disorder
- Discuss how one water principle makes aquatic therapy a beneficial medium to positively impact focus/attention, which will facilitate increased success with target physical therapy goals/outcomes
- List one to two aquatic techniques that address poor motor planning, body awareness, and/or vestibular processing
