MedBridge
Central Vestibular Disorders: Pathology and Management
Laura Morris, PT, MCS

Course Objectives

- Differentiate the clinical signs and symptoms of focal lesions of the central vestibular system.
- Describe the typical impairments associated with mild traumatic brain injury/concussion.
- Distinguish pathologic signs and symptoms related to skull fractures in brain injury.
- Identify common comorbidities associated with traumatic brain injury and central vestibular dysfunction.
- Classify the pathophysiology and the resultant signs and symptoms of vestibular migraine.
