

## **Learning Objectives**

MedBridge

*Screening and Physical Examination for Signs and Symptoms in Pediatric Patients*

Venita Lovelace-Chandler, PT, PHD, PCS

### **Course Objectives:**

- Consider the child's history to identify the systems to be screened and the areas to be examined in more detail.
- Conduct observation, inspection, and palpation of the child to identify signs and symptoms.
- Define important terms for the screening process: signs, symptoms, and yellow and red flags.
- Describe the factors that indicate a finding should be a red flag, indicating the need for a referral.
- Use the screening and physical examination process to guide specific interventions to help the child and family.
