# Learning Objectives

MedBridge

*A Model for Collaborative Intervention Planning in Aphasia*

Katarina Haley, PhD, CCC-SLP

## Course Objectives:

- Identify barriers to collaborative goal setting for aphasia treatment
- Discuss different perspectives on goal setting for the speech-language pathologist and a client with aphasia
- Define communicative participation relative to the concept of life participation
- Define the scope of each intervention component
- Describe the four planning steps
- Discuss the SLP and client roles within the model
- Give examples of potential intervention targets identified by people with aphasia
- Give examples of how preliminary targets may be modified based on input from the speech-language pathologist
- Suggest client-centered strategies for evaluating goal achievement
