Word Retrieval in Aphasia
Mary Boyle, Ph.D., CCC-SLP, BC-ANCDS, ASHA Fellow

Course Objectives:
- Describe the different word retrieval problems caused by aphasia.
- Identify and classify word retrieval error productions.
- Describe how the semantic system is organized
- Depict mechanisms of successful and unsuccessful word retrieval
- discuss how the semantic and memory systems cooperate during word retrieval.
- Describe aspects of word retrieval in connected speech.
- Assess methods for single-word retrieval.
- Assess how word-retrieval impairment affects discourse production.
- Define and analyze the presumed basis of the efficacy of different treatment approaches to word retrieval impairment.
