Learning Objectives

MedBridge
Semantic Feature Analysis Treatment for Individuals with Aphasia
Mary Boyle, PhD, CCC-SLP, BC-ANCDS, ASHA Fellow

Course Objectives:

- Describe the current theory of word retrieval
- Discuss how SFA might work in the context of that theory.
- Analyze how and why the treatment steps for C-SFA might be adapted from the research protocol to use in the clinic.
- Analyze how and why the treatment steps for D-SFA might be adapted from the research protocol to use in the clinic.
- Describe methods of assessing how word-retrieval impairment affects discourse production.
