

## **Learning Objectives**

MedBridge

*Dementia Types: Differentiation & Appropriate Outcome Measures for Rehabilitation*

Deb Kegelmeyer, PT, DPT, MS, GCS

### **Course Objectives:**

- Define dementia and describe reversible forms of dementia including delirium and depression and the causes of these forms of dementia.
- Select and administer tools for identifying depression in older adults.
- Describe and differentiate the symptoms of mild cognitive impairment and common forms of dementia.
- Describe how each form of dementia differs from the other forms.
- Discuss how each form of cognitive decline impacts functional mobility.
- Select and administer valid screening tools for dementia.
- Describe how neurologists differentially diagnose dementia.
