Advanced Physical Therapy Management of Individuals with Parkinson's Symptoms

Deb Kegelmeyer, PT, DPT, MS, GCS

Course Objectives:

- Determine best interventions to incorporate in a treatment plan based on the client's status and current best evidence.
- Compare and contrast several different treatment interventions for a client presented in a case study.
- Select and modify interventions based on the client's individual condition and stage of the disease.
- Examine specific interventions such as dance, Tai Chi, boxing, strength training and others and current evidence for each.
- Discuss the use of specific exercise interventions for a client presented in a case study.
- Examine the use of these specific exercise interventions across all stages of Parkinson disease.
- Describe the implementation of a therapy program across the life-span of the individual with Parkinson disease including both rehabilitation and skilled maintenance therapy.
- Describe the rules and regulations regarding Medicare reimbursement for skilled maintenance therapy.
