Skin and Wound Care in Rehabilitation Nursing

Instructor

Course Objectives:

- Recognize each of the five stages of pressure ulcers.
- Explore the effects of four barriers and four facilitators of wound healing.
- Name five rehabilitation diagnoses that put patients at high risk for skin breakdown.
- Recognize specific risk factors related to diagnoses frequently seen in the rehabilitation setting.
- Discuss the importance of the subscales in a risk assessment for skin breakdown.
- Strategize interventions specific to preventing skin breakdown.
- Explain six vital parameters of wound assessment.
- Contrast wound care products by their action and wear times.
