

Course Objectives

The Ten Minute Neurologic Screening Exam

Description

- The purpose of this course is to review the components of a neurologic screening exam. In particular, we will demonstrate a complete screen of all of the neurologic systems and we will discuss the neuroanatomical implications of each test.

Objectives:

- Describe the neurologic screening exam components in order to prioritize screening for a patient.
- Interpret the findings from the neurologic screen.
- Apply the neurologic screening examination in an efficient and systematic approach.
