

# Learning Objectives

MedBridge

*Facilitating Recovery After Motor Complete SCI*

Candy Tefertiller, PT, DPT, NCS

## Course Objectives:

Upon completion of this course, learners will be able to:

1. Verbalize and identify the differences between restorative-based, compensatory-based and recovery-based rehabilitation after SCI.
2. Differentiate between the extrinsic and intrinsic neural factors that impact recovery.
3. Identify different treatment paradigms for individuals with motor complete SCIs and understand the functional implications associated with varying levels of injury.
4. Describe the functional implications associated with neurologic level of injury and ISNCSCI classification to provide skilled rehabilitation to individuals with SCI.
