Model of Collaborative Integrated Service Delivery

Jan Hollenbeck, OTD, OTR

Course Objectives:

- Understand how a focus on participation, services in context, and collaborative practice can move toward more integrated and effective student services.
- Describe the rationale for working in natural contexts/integrated settings.
- Apply a model of collaborative integrated intervention to your student population that aligns practice with policy, available evidence, and current views of best practice.
- Describe the role of intervention planning in guiding service delivery recommendations.
- Reflect on current practice and Identify ways to move toward more collaborative and integrated services that address student participation in educational contexts and identify next steps for immediate implementation.
