Therapeutic Intervention in the NICU

Roberta Gatlin, PT, DScPT, PCS

Course Objectives:

Upon completion of this course, learners will be able to:

- Identify the reasoning for providing cluster care to the neonate in the NICU.
- Recognize signs and cues of a neonate's readiness for intervention.
- Describe the positioning importance of the neonate while in the NICU.
- Identify long-term effects of malpositioning of the neonate.
- Identify when range of motion and massage are an appropriate intervention with the neonate in the NICU.
- Provide rationale for selection of a therapeutic intervention with a neonate and their family/caregiver while in the NICU.
