MedBridge

Spaced Retrieval: An Evidence-Based Memory Intervention

Jennifer Brush, MA, CCC/SLP

Course Objectives:

Upon completion of this course, learners will be able to:

- Analyze the key components of memory as they relate to individuals with dementia
- Demonstrate why SR works so it can be effectively used as a therapeutic intervention
- Identify individuals who would benefit from SR and execute the technique correctly to improve therapy outcomes
- Create visual cues that enhance learning of target information and improve retention
- Identify when the SR process should be modified to enhance client outcomes
- Explain when to involve the rest of the care team to support learning and retention of the target information
