

## **Learning Objectives**

MedBridge

*Overview of Outpatient Therapy Options for Treating the Injured Worker*

Michael Gerg, DOT, OTR/L, CHT, CEES, CWCE

### **Course Objectives:**

- Understand the outpatient therapists' role in facilitating return to work for their clients.
- Differentiate the different types of services that can be provided to the patient, their physician, and the employer to help ensure a successful transition to gainful employment or disability determination.
- Evaluate the possible services that could be provided in the practitioner's given treatment setting.
- Identify evidence-based strategies for the successful return to work of an injured work.
