MedBridge

*Augmentative and Alternative Communication Intervention for Adults with Neurogenic  
Communication Disorders*

Sarah E. Wallace, Ph.D., CCC-SLP & Kristy Weissling, SLP.D., CCC-SLP

---

## **Course Description:**

Adults with acquired communication disability can present with a variety of motor, cognitive, and linguistic issues that affect AAC use. The presenters will identify the characteristics of a variety of adult acquired communication disorders, review appropriate AAC strategies, and describe evidence-based intervention strategies.

## **Course objectives:**

1. Describe how visual scene displays are used by people with aphasia.
2. Describe a multimodal intervention program designed to address strategic competence.
3. Describe how errorless learning can support navigation strategies.
