Brain Injury & Behavioral Dyscontrol: Impact of Cognitive Deficits

Robert Karol, Ph.D., LP, ABPP-RP, CBIST

Course Objectives:

- Delineate important areas of the brain related to behavioral dyscontrol
- Explain the effect of injury to those brain regions
- Compare crucial cognitive functions related to behavioral dyscontrol
- Explain the behavioral effect of each cognitive function
- Describe concepts underlying cognitive assessment
- Explain how to compare and contrast test results across multiple tests
