Recent Advances in Treatment and Diagnosis of Posterior Canal BPPV

Susan Whitney, DPT, PhD, NCS, ATC, FAPTA

Course Objectives:

- Describe the prevalence and recurrence rates of persons with PC-BPPV.
- Recognize the impact of posterior canal BPPV (PC-BPPV) on a person's participation and functional limitations.
- Predict the typical presentation of a person with PC-BPPV.
- Identify some of the atypical presentations of persons with PC-BPPV.
- Differentiate factors for the safe performance of the examination and treatment of persons with PC-BPPV and conditions that might place the person at risk if modifications are not made.
