## Learning Objectives

MedBridge

*Pediatric Motor Problems & Visual Impairment: Introduction*

Cynthia N. Potter, PT, MS, DPT

### Course Objectives:

- Describe the impact of a visual impairment on development of postural stability, acquisition of gross and fine motor skills, and motor planning
- Assess the impact of physical disabilities on visual development and use of functional vision
- Discover evidence which supports use of specific strategies when treating the child with a visual impairment
- Analyze case examples to incorporate appropriate visual strategies into physical therapy interventions
