Goal & Target Selection for Early Vocal Development: Children Aged 0-3

Barbara L. Davis, PhD, CCC-SLP

Course Objectives:

Upon completion of this course, learners will be able to:

- Discuss the clinically relevant issues specific to planning intervention goals and targets for children with vocal/verbal delay or disorder who are 0-3 years of age
- Recognize normal milestones for early vocal development and how they support planning intervention goals and targets for children with vocal/verbal delay or disorder who are 0-3 years of age
- Identify intervention approaches that can be adapted for planning intervention goals and targets for children with vocal/verbal delay or disorder who are 0-3 years of age
- Describe goals related to each intervention approach for children with vocal/verbal delay or disorder who are 0-3 years of age
- Discuss intervention targets and how they can be developed to support intervention goals for children with vocal/verbal delay or disorder who are 0-3 years of age
