Transitions of Care: Dementia Part 2

Cathy Wollman, DNP, RN, GNP-BC, CRNP

Course Objectives:

Upon completion of this course, learners will be able to:

- Evaluate individual resident and family goals based on the prognosis and potential for rehabilitation
- Formulate essential discharge planning based on the resident and caregiver's ability to manage a complex plan of care at home
- Validate the resident and caregiver's understanding of medications, activity, diet, and symptoms to report to the provider following discharge
- Interpret individualized risk assessment data of the resident with dementia to determine appropriate referrals at the time of discharge
- Incorporate advance care planning into the resident plan of care
- Implement palliative or hospice care when the resident with dementia displays continued functional decline
- Analyze the case study of a complex resident with dementia during a transition of care
