Recorded Webinar: Engaging Clients With Maladaptive Behaviors

Aimee Perron, PT, DPT, NCS, CEEAA

Course Objectives:

Upon completion of this course, learners will be able to:

- Describe foundational elements of human behavior
- Analyze which parts of the brain controls which human behavior
- Evaluate the difference between adaptive behavior and maladaptive behaviors
- Develop a further understanding of behavior theory including the concepts of antecedents and consequences
- Recognize and understand what maladaptive behaviors are and why they occur in both the aging brain and in specific illness, disease, or injury
- Implement appropriate and successful management techniques for maladaptive behaviors specific to mental illness, disease, or injury
- Apply learned concepts and strategies to promote person centered care through case based examples and learning assessment
