Delirium Part 2: Tools and Techniques for Screening and Assessment

Kathleen Fletcher, RN, DNP, GNP-BC, FAAN

Heather Teller, BSN, BA, RN, CMSRN, GRN

Course Objectives:

Upon completion of this course, learners will be able to:

- Distinguish between the preventing features of delirium, dementia, and depression, and combinations of the three
- Describe several evidence-based screening tools that are available to nurses in various settings
- Identify the pros and cons of using tools for delirium screening
- Contrast screening tools for delirium, dementia, and depression
- Discuss the importance of family members and members of the health care team in observing and reporting changes in mental status
