## Learning Objectives

MedBridge

*Treatment for Atypical Breathing: Segmental Breathing Facilitation*

Deanna M. Wanzek, PT, PCS, CKTI, CLT

### Course Objectives:

- Use manual techniques to facilitate movement through various parts of the rib cage
- Treat the infant relative to facilitation of the rib cage musculature
- Understand the importance of incorporating movement with breathing
- Explain the rationale for postural alignment for breathing
- Select the proper resistance blowing equipment relative to the breathing pattern
