MedBridge

Identifying, Communicating, & Documenting Patient Change in Condition

Tina Marrelli, MSN, MA, RN, FAAN and Cathleen Armato, RN, CHPN, CHC, CHPC

Course Objectives:

- Define a patient change in condition from a Medicare and a practical perspective
- Identify ways to accurately and timely identify a patient change in condition
- Demonstrate effective communications with physicians related to a patient change in condition
- Explain a model that can be applied to a patient change in condition through to documentation
- Apply concepts and information presented to practice, operations, and management
