A Clinical Application of Easing Pain via Neuroplasticity

Adriaan Louw, PT, PhD, CSMT

Course Objectives:

Upon completion of this course, learners will be able to:

- Explain the structural and functional changes in the brain as it pertains to pain
- Recognize various clinical tests that can be used to screen for altered neuroplasticity
- Apply brief remapping techniques in a variety of patient cases
- Describe how brief remapping techniques can alter patient sensitivity and positively influence pain in real-life clinical practice
- Synthesize the information from the educational session into clinical practice
