# Learning Objectives

MedBridge

*Increasing Speech Intelligibility of Spanish-Speaking Children*

Raul F. Prezas, PhD, CCC-SLP

## Course Objectives

- Describe speech severity levels of children and the impact severity has on target selection.
- Recognize strategies for determining optimal production practice words for phonological intervention.
- Identify optimal target words for different phonological patterns in therapy.
- Describe strategies and considerations for implementing bilingual phonological intervention for children with highly unintelligible speech in a group setting.
- Identify recommendations for monolingual practitioners working with bilingual children.
