

## **Learning Objectives**

MedBridge

*Post-Op Home Care: Minimize Complications & Enhance Rehabilitation - Part 1*

Dedee Culley, RN

### **Course Objectives:**

- Identify the home health patient population who have post-op care needs and those patients who may be at greatest risk for complications.
- Summarize the most common post-op care needs provided in the patient's home.
- Create a plan for assessments and observations to prevent and/or identify complications at various timepoints of recovery/rehabilitation.
