
Learning Objectives

MedBridge

Patient-Centered Care, Education Tools, and Perceptual Awareness

Helen L. Masin, PT, PhD

Course Objectives:

Upon completion of this course, learners will be able to:

- Adapt how you communicate with your patients based on the rewards and feedback styles preferred by different generation profiles
- Explain the role of perceptual differences and its impact on interactions between the clinician, patient, and family members
- Understand and apply qualitative assumptions to better communicate with patients and families
- Identify how to integrate different patient education models to improve patient-centered care in pediatric PT and OT
