

## **Learning Objectives**

MedBridge

*Integrative Clinical Reasoning Part 2: Applications in Practice*

Eric Robertson, PT, DPT, OCS, FAAOMPT

### **Course Objectives:**

- Integrate terminology from various sources into patient management
- Identify various clinical reasoning models
- Utilize reasoning tools to better understand patient management
- Apply complex, multifactorial clinical reasoning strategies to patient management
- Apply information from patient cases, including acute and chronic low back pain, complex regional pain syndrome, and osteoarthritis, to clinical practice
