Reducing Falls in Nursing Homes

Sue Ann Guildermann, RN, BA, MA

Course Objectives:

- Apply effective problem-solving steps
- Identify the internal, external, and operational clues and evidence for the root causes of a resident fall in a nursing home
- State observations in a post-fall huddle
- Match interventions appropriate to the identified causes
- Monitor any effects from the implementation of any new interventions and changed actions or procedures
- Evaluate the outcomes, both positive and negative, of these new interventions
