HIV and AIDS: Education for Florida State Clinicians

Nancy Allen, BSN, RNC, CMC

Course Objectives:

Upon completion of this course, learners will be able to:

- Understand the impact of HIV and AIDS in the United States and in Florida and where, why, and how this impacts infection control and clinical management
- Implement strategies to learn and educate on modalities of transmission for effective infection control, thereby decreasing exposure and risk of contracting and transmitting disease
- Differentiate between the methods of testing and treatment, and understand what is expected of the health care worker and the patient according to current Florida law
- Determine the best clinical management and utilization of resources to overcome barriers to care for infection control, treatment, and care of the patient
