IASTM: An Introduction to the Lower Quarter

Dr. Shawn Burger, PT, DPT, CSCS

Course Objectives

- Provide the history of IASTM, which will allow clinicians to know the role of IASTM in lower quarter rehab
- Learn and discuss the four generally accepted modes of IASTM application
- Review histology and current lower quarter research to allow clinicians the basis to integrate IASTM into his/her practice
- Review the pros and cons of instrument build to allow clinicians to choose the best instrument for treating in the lower quarter
- Demonstrate lab techniques for the lower quarter in order to improve the skill opportunity for interested clinicians
