Learning Objectives

MedBridge
Oculomotor Assessment in Concussion
Anne Mucha, DPT, MS, NCS

Course Objectives
Upon completion of this course, learners will be able to

- Be able to perform screening for vestibular and oculomotor dysfunction using the Vestibular/Ocular Motor Screening (VOMS)
- Interpret information gained from the VOMS in order to identify impairment and possible intervention/referral
- Describe the role of PTs and OTs in vision assessment following a concussion
- Be able to perform an oculomotor exam for concussion, including testing of smooth pursuits, saccades, vergence, accommodation, and ocular alignment
- Understand relevance of findings in the ocular motor exam and intervention options
