Strategic Therapeutic Management of Late-Stage Parkinson's Disease (Recorded Webinar)

Heather Cianci, PT, MS, GCS

Course Objectives

Upon completion of this course, learners will be able to

- Describe motor and nonmotor symptoms and complications of late-stage Parkinson's disease
- Interpret evaluation findings in order to provide defensible documentation of goals
- Measure how patients are responding to treatments and employ changes as needed in order to provide appropriate care
- Identify the signs of care partners needing more emotional and physical support
- Translate information on palliative and hospice care that promotes a supportive care environment to patients and care partners
