Learning Objectives

MedBridge
Parkinson's Disease: Applying What We Know Now (Recorded Webinar)
Mike Studer, PT, MHS, NCS, CEEAA, CWT, CSST, FAPTA

Course Objectives

Upon completion of this course, learners will be able to

- Identify four relevant physiologic changes that occur in PD and the evidence on objective testing of each impairment
- Apply recent evidence leading to three novel clinical interventions to each of the classifications or presentations of PD
- Identify three established best clinical measures for each of the functional limitations and subtypes of PD
- Facilitate the production of clinical case studies and research furthering the classification of PD subtypes and treatment approaches therein
