MedBridge

Multidisciplinary Head and Neck Cancer Clinical Pathway Implementation

Barbara Pisano Messing, PhD, CCC-SLP, BCS-S, FASHA

Course Objectives

Upon completion of this course, learners will be able to

- Integrate the current national and international models of HNC care delivery designed to manage patients with complex needs and address functional deficits in a proactive approach over time
- Produce a functional framework designed to help in the development of a MDT–HNC clinical pathway
- Evaluate variable patterns of functional and QOL outcomes across time to manage early and long-term acute toxicities of mucositis, pain, dysphagia, dysgeusia, dry mouth, and sticky saliva in a timely manner for improved patient outcomes
- Interpret how patients benefit from ongoing monitoring and evaluation during and post treatment using a structured, systematic MDT clinical pathway to maximize patient outcomes
