Postoperative Rehabilitation for Tendon Transfers of the Wrist and Hand

Aviva Wolff, EdD, OTR, CHT

Upon completion of this course, learners will be able to

- Distinguish the indications, considerations, and purpose of hand and wrist tendon transfer surgery
- Administer a comprehensive preoperative and postoperative assessment using specialized tests and available evidence to identify occupational limitations and disability level
- Determine the range of surgical options for common tendon transfers for nerve palsies and other neuromuscular conditions to properly assess and treat postsurgical tendon transfers
- Prepare a patient-specific preoperative and postoperative plan of care based on best evidence for tendon transfer procedures
