Dysmorphology and Craniofacial Syndromes

Ann W. Kummer, PhD, CCC-SLP, F-ASHA

Upon completion of this course, learners will be able to

- Examine the different types of dysmorphology and argue why speech-language pathologists should be astute craniofacial and oral dysmorphologists
- Determine evidence of certain craniofacial syndromes and describe some of their characteristic anomalies
- Distinguish the major features of 22q11.2 deletion (velocardiofacial) syndrome and why it's important for SLPs to recognize this syndrome
